PFS Internet Development

BGP (Border Gateway Protocol) is the routing protocol of the Internet. Without it, we'd have no Internet, at least not as we know it today.

PFS Internet Development is a consultancy involved in the ongoing development of Internet infrastructure around the world. The company's owner, Philip Smith, has been involved in the Internet industry since the late 1980s, in roles ranging from commercial ISPs, to working in development activities for a major Internet equipment vendor, to working for not-for-profit organisations.
